

Company Overview

Cloud and software-based video processing, delivery, and monetization

Envivio (NASDAQ:ENVI) is the leader in cloud and software-based video solutions for any screen, with over 300 content and service provider customers worldwide. Envivio solutions remove the boundaries of traditional television and enable operators to increase revenues by providing viewers with best-in-class video quality and a compelling, personalized experience.

Our advanced software solutions for pay TV and any-screen applications perform IP-based video encoding/transcoding, processing, packaging, ad insertion and delivery for broadcast TV, HTTP streaming and mobile video services, and are available on Intel-based appliances or IT blade servers.

Headquartered in San Francisco, CA with R&D in Rennes, France, Envivio was founded in 2000. Envivio is a leader in video technology and innovation, with 17 patents and numerous industry awards.

Management Team

- Julien Signes** President, CEO, Co-founder
- Erik Miller** Chief Financial Officer

Envivio Solutions

Video Processing

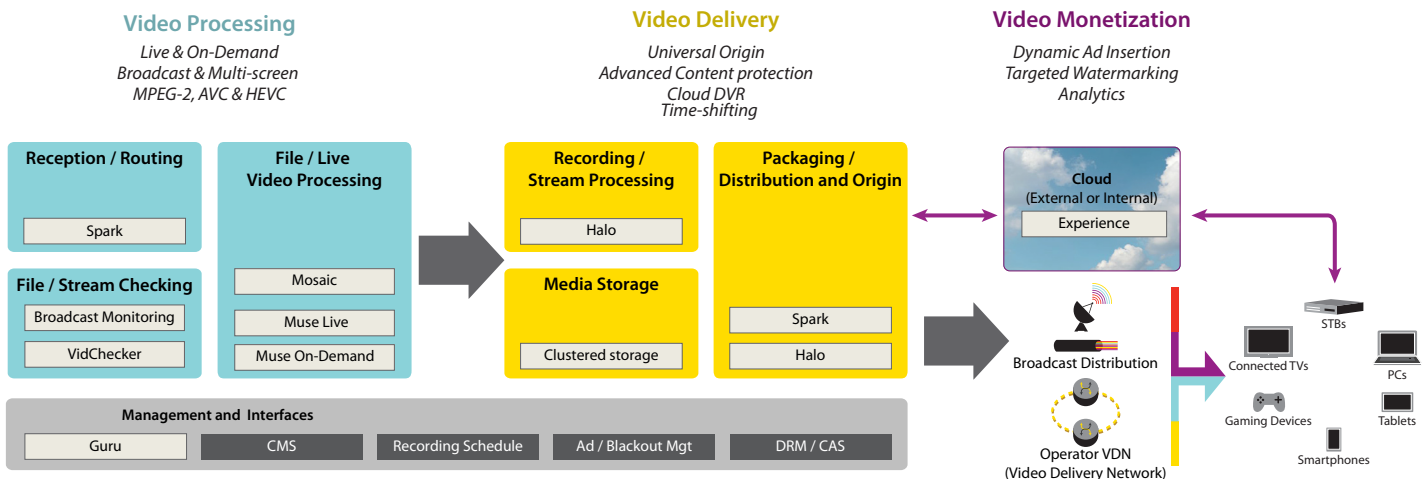

- A single software headend for broadcast and multi-screen delivery to any screen and any network
- Live and file transcoding to any codec (including HEVC), format and resolution up to Ultra HD quality
- Mosaic, content replacement (ads, blackout)
- Stream and video quality (VQ) monitoring, file quality control

Video Delivery

- Universal origin for all ABR formats
- Time-shifting, Catch-up TV and personal Cloud DVR services
- A hybrid video content delivery network combining traditional IPTV/cable video on-demand (VOD) and multi-screen delivery
- Largest number of protocols and digital rights management (DRM) supported to reach the highest number of devices

Video Monetization

- Seamless and network-based dynamic ad insertion for live and on-demand video
- Analytics with audience and CPM measurement
- Targeted watermarking

NuageSM SaaS Platform

Nuage is Envivio's cloud-based software as a service (SaaS) platform that encompasses virtualized encoding, packaging, DRM, content management, billing, ad mediation, content delivery network (CDN), and app creation. This innovative new approach allows operators to streamline service deployment and delivery, saving on capital expenditures and radically improving time-to-market.

Customers

Envivio powers services for more than 300 content and service provider customers around the world, including eight of the top 10 mobile operators, nine of the top 10 broadband providers and three of the top four US cable operators.
