Real-Time Rugged AI Edge Computer

At our booth, we present the IV320-AS-X Rugged AI Edge Computer, an Intel collaborative solution powered by Intel® Core™ Ultra processors.

The demo highlights real-time multi-sensor fusion and AI inference at the edge, enabled by Intel's high-performance compute and connectivity. The IP65-rated, fully sealed system showcases rugged reliability under vibration, extreme temperatures, and EMI, while dual 2.5GbE LAN ensures stable data flow.

An ISR-style operational video demonstrates Intel-powered edge analytics for fast decision-making and enhanced situational awareness in demanding environments.
