ASRock Rack at MWC 2025: Enhancing AI Infrastructure from Edge to Cloud

As a leading innovative server company, ASRock Rack continues to drive advancements with its newly launched Intel® Xeon® 6 server solutions, enabling breakthroughs in AI-driven applications and next-generation infrastructure across industries such as edge computing, content delivery networks (CDN), and cloud services.

ASRock Rack offers comprehensive end-to-end server portfolio designed to enhance AI infrastructure from edge to cloud. At MWC 2025, ASRock Rack will highlight its latest high-performance servers, including the liquid-cooled 4U8X-GNR2/DLC SYN B200 and air-cooled 8U8X-GNR2, powered by Intel® Xeon® 6 processors and optimized for AI training workloads. Also featured are the 1U8E1S, optimized for content delivery networks, and the 2U4N-F front-access multi-node system, designed for edge data centers.

Beyond systems, ASRock Rack provides Intel-based x86 server boards in multiple form factors, such as the GNRD8-2L2T and half-width SPC741D10HM3, enabling businesses to build customized network appliances and AI-optimized servers tailored to diverse computing needs.
