

AI that moves the world.

That's the power of Intel Inside®.

ADVANTECH

Edge Computing & AI-Powered WISE Solutions

Advantech warmly welcomes you to visit Booth 339, where we introduce our latest Intel collaborative solutions and showcase cutting-edge embedded and platform technologies.

Powered by Intel® Core™ Ultra Series 3 processors, Advantech's Edge AI solutions feature integrated AI acceleration delivering up to 180 platform TOPS, enabling advanced workloads such as real-time defect inspection, predictive maintenance, and intelligent monitoring directly at the edge. These capabilities allow customers to achieve faster decision-making while reducing cloud dependency, lowering data transfer costs, and optimizing total cost of ownership.

By combining Intel's high-performance computing architecture with Advantech's industrial-grade design and long-lifecycle support, we provide scalable, reliable platforms that help customers accelerate AI adoption and digital transformation across manufacturing, automation, and industrial applications.
