

Intelligence is your edge.

Powered by Intel.

Enabling an Intelligent Planet

Visit Advantech at Embedded World 2025 and explore how our collaboration with Intel accelerates innovation in Edge AI, Robotics, and Medical applications. Discover Intel-powered SOMs, SBCs, and embedded systems that combine high performance, scalability, and long product lifecycles. Experience live demos of Intel® Core™ Ultra processors and integrated with AI toolkits and ecosystem-ready software that simplify design and shorten time-to-market. Don't miss our 15-minute booth tours, where experts will showcase the latest Intel-based solutions for industrial and medical use cases. Plus, learn how you can kickstart your robotics development with the Advantech AFE-R360 Robotic Development Kit (AFE-R360DVK)—now available with a 30-day free trial. Together, Advantech and Intel deliver the industry's most complete embedded platform, backed by global support and lifecycle services.
