

AI that moves the world.

That's the power of Intel Inside®.

Edge AI Solutions for Embedded Systems

DEMO1: AI Playground is a locally run, open-source Generative AI application suite optimized for Intel® Core™ Ultra processors and Intel® Arc™ GPUs. Demo Runs on an Intel Core Ultra 7 processor 155H.

DEMO2: Intel Powered Vision AI. With the help of OpenVINO™, a software AI demo is run on the ONE AI using the integrated Intel NPU. A tripod with a turntable is used for this. Small objects are placed on the turntable, which are recognized by the OneAI AI and checked for errors. Visualization is provided by the Camera tool in OneWare Studio. The demo is intended to demonstrate the speed and accuracy of Intel-powered OneAI models.
