

AI that moves the world.

That's the power of Intel Inside®.

From Edge to Industry: Ubiquitous, Incredible AI

Visit ASUS IoT at Hall 3, Booth #3-257 during Embedded World 2026 to experience the future of ubiquitous intelligence. In strategic collaboration with Intel, we showcase next-generation edge AI solutions transforming manufacturing and smart cities.

Witness the synergy of ASUS hardware and Intel® Core™ processors (Series 2) and Intel® Core™ Ultra Series 3 processors. A premier highlight is the PE8000G demo, utilizing the OpenVINO™ toolkit and dual Intel® Arc™ Pro B60 GPUs to power an interactive AI avatar. This setup features natural voice interaction and person detection, with one GPU dedicated to a large LLM and the other handling real-time lip-sync rendering.

Other featured highlights include the RUC-2000 series (180 TOPS) and Industrial Edge Servers. Explore real-world applications and see how ASUS IoT and Intel accelerate real-time decision-making.
