

Offline, Secure & Multilingual AI Agent

BharatGPT

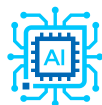

BharatGPT Mini, CoRover's enterprise grade Sovereign AI LLM offers secure, multilingual, and offline-capable conversations, ensuring uninterrupted access even without internet connectivity. As an AI Agent, it helps organizations reduce support costs, protect data privacy, scale across industries, and improve user experience with instant, reliable responses.

BharatGPT Mini, a Small Language Model (SLM) operates locally in offline mode, enabling real-time, multilingual support without needing internet access. This uniquely positions CoRover to serve users in rural areas where connectivity is limited, or in defense, healthcare, and other sectors where data privacy is critical.

By processing data entirely on-device, BharatGPT Mini ensures fast, secure, and private interactions-meeting government and enterprise demands for data sovereignty and reliability. These capabilities help CoRover expand into untapped markets, differentiate from cloud-only competitors, and align with India's Digital and Atmanirbhar Bharat missions.

Key Intel-Enabled Features

Offline AI

Low-Latency

Data Security

Edge-Ready Scaling

Accelerate Business Transformation with Optimized, Ready-to-Deploy, Intel-Powered AI Partner Solution

- Optimized AI inference with Intel® CPUs, NPUs, and accelerators
- Fast, reliable, low-latency performance at the edge
- Hardware-based security for trusted offline data handling
- Scalable deployments with Intel's ecosystem and GTM support
