Enable Intelligent, Secure, and Efficient Retail Environments

Cisco Unified Edge is a full-stack, converged compute architecture that combines compute, networking, and storage into a single AI-ready platform, redefining edge computing with data center performance, modularity, centralized management, and built-in security at the edge.

Powered by Intel® Xeon® 6 SoC, Cisco Unified Edge's modular design, high-performance networks, and pre-validated solutions deliver fast, agile, and uninterrupted AI operations, accelerating the future of retail in the AI era.
