CVTE x intel®

Experience Next-Gen OPS Innovation

Visit our booth to witness the showcase of the next-generation OPS 2.0 computing module, a groundbreaking advancement co-developed through CVTE's deep partnership with Intel. Engineered to redefine visual performance, this new module integrates Intel's latest high-performance architecture to empower CVTE devices to render stunning 8K graphics effortlessly.

Leveraging this superior processing power, the OPS 2.0 delivers an unrivaled viewing experience, ensuring exceptional clarity and fluidity for professional display scenarios. Join us to discover how CVTE and Intel are continuing to revolutionize visual solutions and setting a new benchmark for the industry.
