

AI that moves the world.

That's the power of Intel Inside®.

DENSITRON × intel®

End-to-End Expertise, Tailored to Your Needs

With over 50 years of leadership in display, touch, HMI and control system solutions, Densitron delivers precision engineering, intelligent interaction and seamless control that helps customers solve complex technical challenges and accelerate time to market.

ProDeck range: A professional desktop control surface for fast, confident mission-critical operation. It features HD displays, tactile controls, onboard Intel® Atom™ processing, configurable HD buttons, and PoE+ for clean installation. Its software-agnostic design supports seamless integration with a wide range of applications and comes in 24, 40, and Touch models.

UReady range: Compact rack-mounted touchscreens deliver clear monitoring and reliable control in tight spaces, with optional tactile inputs. The 2RU Haptic model adds touch feedback, Ethernet control, and an Intel® Pentium® Processor N4200.

IQ 2: Quixant's gaming-grade system offers immersive performance with up to 32GB memory, Intel® UHD Graphics, LED interface, and support for three displays.
