

# The Hub of Every Meeting

Lenovo  intel.

## Easily Collaborate on a High-Performance Meeting Hub

Organizations with busy meeting spaces often struggle with complex cable runs, scattered peripherals, and inconsistent user experiences. [ThinkSmart Hub](#) solves these challenges with an all-in-one center-of-table device that brings compute, mic array, speakers, and meeting controls into a single, cohesive system. Its familiar interface makes it easy for users to start or manage meetings without relying on room support, while the built in audio and quad mic array deliver clear, reliable performance for conference calls. The Hub's compact footprint reduces desk clutter and eliminates the need for separate components, creating a clean and professional environment. IT teams benefit from centralized management, secure remote monitoring, and simplified updates across fleets of rooms. With rapid installation, enterprise grade reliability, and a unified design that fits both small and medium spaces, ThinkSmart Hub provides a consistent meeting room experience that stands apart from multi device setups. Built on the advanced security features of Intel vPro®, the ThinkSmart Hub Gen 2 ensures seamless, high-performance meetings and uninterrupted collaboration.
