

AI that moves the world.

That's the power of Intel Inside®.

Geti™: Powerful AI for Everyone

Geti puts the power of advanced AI directly into the hands of edge users, from industry specialists and software developers to data scientists, enabling them to effortlessly design and launch robust, production-ready AI models at speed, using less data than ever before. With Geti, Intel hardware reaches new heights in efficiency and innovation, setting the stage for what's next.

- Open-source computer vision software
- AI model lifecycle covered in one app
- State-of-the-art computer vision models
- Fine-tuning & inference on Intel hardware
- On-prem, edge-native by design

Key Features:

- Interactive Model Training
- Smart Annotations
- Visual Prompting
- Multiple Computer Vision Tasks
- Task Chaining
- Model Evaluation
- Production-Ready Models

Key Applications:

- Manufacturing
- Healthcare
- Agriculture
- Smart Cities
- Retail
