

Edge AI Surveillance for Faster Public Safety Response

Edge Guardian

Edge Guardian by RadarApp is an intelligent edge AI video-security solution designed to help public-safety organizations identify, validate, and respond to events at the source. It combines high-resolution PTZ cameras, video analytics, local processing, and real-time alerts in one rugged, deployable platform.

Designed for the Edge

Local inference reduces bandwidth demand, limits cloud dependency, and helps maintain continuous monitoring in distributed sites.

- Detect locally
- Validate in real time
- Alert and coordinate response

Cloud
Independence

- The [OpenVINO™ toolkit](#) accelerates AI inference for rapid event detection.
- [Intel® Core™ processors](#) support efficient edge analytics and alerting.
- [Intel® Xeon® processors](#) enable scalable centralized and federated workloads.
- Edge processing supports continuous monitoring with less cloud reliance.

By leveraging Intel® technologies, Edge Guardian helps organizations address latency, bandwidth, and privacy challenges — enabling faster event validation, resilient operations, and scalable edge security.
