

We finally have eyes and ears covering our entire infrastructure and are far better prepared to offer a continuous supply of fresh and safe water to all our customers.

Security Management Professional
at Trinity River Authority

EPIC iO Site Security

accelerated by **intel.**

EPIC iO offers a comprehensive range of IoT, connectivity, and AI solutions that seamlessly integrate with your existing infrastructure. Our DeepInsights platform analyzes data from multiple sources, including cameras and IoT/OT sensors, to provide real-time insights and actionable intelligence. By delivering meaningful outcomes, our solutions address key challenges such as theft and vandalism, perimeter security, waste management, asset tracking, and regulatory compliance. With high-resolution smart cameras and advanced sensors, you can ensure 24/7 protection, detect suspicious behavior or operational anomalies, and receive instant alerts to mitigate threats. Our system helps prevent sabotage and theft, enhances workplace safety, reduces the risk of serious injuries, and enables remote monitoring—all from a centralized platform.

Key Features				
	Object Detection	Object Tracking	Re- Identification	Enhanced Analytics

Safe Environments
Reimagined with IoT-
Driven Safe Solutions

Vertical:
Retail
Energy
Government
Medical

Use Case:
Machine Condition Monitoring
Assets & Operations Optimization
Energy Monitoring and Management
Situational Monitoring
Environment Monitoring

Country/Geo:
North America
