## Kratos - SOSA Aligned 3U VPX

Kratos has introduced a new solution featuring the Intel® Xeon® Processors in a SOSA™-compliant 3U VPX form factor, designed to support secure 5G communications systems in defense and federal applications. Concurrent is announcing the industry's first SOSA-compliant 3U VPX solution powered by Intel® Xeon® 6 Processor, offering a vRAN accelerator, 256GB of DDR5 DRAM, and 2TB of storage, with an optional FIPS 140-3 security module for enhanced data protection.

### Intel Product and Technology

Intel® Xeon® Processors deliver high-performance computing for professional workstations, offering advanced AI acceleration, reliability, and scalability for workloads like content creation, engineering, and data science.
