SINTRONES

In-Vehicle Edge AI Computing

Intel-Powered Real-Time Threat Detection for Public Safety

Ensuring public safety in transportation is paramount, yet traditional surveillance systems often fall short on real-time threat detection. By harnessing AI-driven analytics, IoT connectivity, and intelligent vision, SINTRONES' Realtime Threat Detection solution bolsters security by instantly spotting hazards and issuing targeted alerts. Using SINTRONES' ABOX-5220 which powered by Intel® Core™ i9 processor, Intel® Arc™ A370E GPU, and optimized with OpenVINO™ plus Intel® Geti™ software, this platform delivers real-time monitoring, proactive threat analysis, and remote security management—enabling swift incident prevention and operational efficiency.
