## Intel® Ethernet Network Adapter: Building the Embedded Connectivity Future

Intel is driving innovation in Ethernet connectivity with Intel® Ethernet E830 Controllers and Intel® Ethernet E610 Controllers, delivering high-performance solutions tailored for ODMs/OEMs.

By showcasing the seamless integration of Intel® Xeon® Processors and a comprehensive connectivity portfolio, we enhance product visibility, strengthen brand awareness, and generate new business opportunities. With industry-leading technical expertise, Intel continues to set the standard for embedded Ethernet solutions, empowering customers with reliable, high-performance networking for their evolving needs.

### Intel Product and Technology

#### Intel® Ethernet Controllers

Intel provides data centers worldwide with innovative Ethernet components and solutions that are extensively tested for network interoperability, reliability, and performance

#### Intel® Distribution of OpenVINO™ Toolkit

OpenVINO™ toolkit accelerates AI inference with lower latency, higher throughput, and optimized hardware use, enabling efficient deep learning in computer vision, LLMs, and generative AI.

#### Notices & Disclaimers

Intel technologies may require enabled hardware, software or service activation.

No product or component can be absolutely secure.
