BOSCH

Physics and AI-Based Hybrid Digital Twin Solutions

Bosch Digital Twin Industries offers Physics and AI-based hybrid Digital Twin solutions to enable customers to effectively manage their industrial operations, maintain the business-critical assets and processes with reliability in operations. The solution impact to the customer translates to increased revenues and enhanced profits by minimizing unplanned downtime and identifying hidden inefficiencies. As a human assist system, it enables people to safely monitor and act on the alerts and warnings in areas which are in tough conditions and difficult to access. The end goal of this solution is to improve overall equipment effectiveness (OEE) through optimized energy efficiency and lower cost.
