## Powered by Intel

### Canonical and Intel at Embedded World: Showcasing Real-Time Solutions

At Embedded World, Canonical is proud to showcase our joint solutions with Intel, featuring a captivating demo that highlights the real-time capabilities of Ubuntu optimized for Intel's advanced hardware, providing seamless integration of operating system and hardware for enhanced performance.

With real-time Ubuntu running on Intel's cutting-edge hardware, enterprises can achieve unparalleled performance, reliability, and security. This collaboration provides developers and manufacturers with a robust framework to ensure the longevity and success of their devices in the field.

Visit Canonical's booth to experience firsthand the synergy between Ubuntu and Intel technologies and learn how our collaboration can elevate your enterprise solutions with cutting-edge, real-time capabilities. Engage with our experts to explore the possibilities for your projects.
