### Computer-on-Modules

Congatec is showcasing brand-new Computer-on-Modules based on the latest Intel technologies. Ranging from the credit card-sized conga-SA8 SMARC module, using the low-power Intel® Core™ 3 processor, to the high-performance conga-HPS/cBLS COM-HPC Client module using 8<sup>th</sup> Gen Intel® Core™ processors, Congatec's customers benefit from access to the latest processor technologies and reliable designs, making the company a leading global provider of high-performance hardware and software building blocks for embedded and edge computing solutions.
