

Intelligence is Your Edge

Powered by Intel

The Intel logo, consisting of the word "intel" in white lowercase letters on a blue square background.

DFI

Accelerates Edge AI Innovation with DFI

DFI, a global leader in embedded motherboards and industrial computing, will showcase edge AI innovations with our partners, focusing on high-performance and power-efficient platforms and solutions at Embedded World 2025. DFI will also introduce the latest ruggedized computing, scalable edge systems, and key industry collaborations, driving efficiency and intelligence across industrial edge AI environments. Key applications include smart cities, transportation, industrial automation, smart healthcare, smart energy, and defense technology, demonstrating the transformative potential of edge AI in real-world scenarios.

Partner Name

DFI Inc.

Solution Name

System Boards
Embedded PCs
Modular Industrial PCs

Booth Location

Hall 3
Booth #3-533
