EXOR

Real-Time Wireless Industrial Communication with Enhanced Security

EXOR International presents an advanced solution for real-time industrial communication, combining X7 Wireless and XedgeExpanded devices, both equipped with the GigaSOM02 module and featuring the Intel® Wi-Fi 6E AX210 (Gig+) IOT Industrial Kit. Leveraging WTSN (Wireless Time-Sensitive Network) technology, this solution ensures ultra-low latencies of up to 1 millisecond, enabling reliable performance even in safety-critical environments.
