

Intelligence is Your Edge

Powered by Intel

Arrow Island Reference Kit: Unleash the Power of Edge AI

The Arrow Island Reference Kit is a cutting-edge platform designed to accelerate your Edge AI development. Powered by the latest Intel® Core™ Ultra processor, this kit delivers exceptional performance and responsiveness for various applications. The Arrow Island kit ensures seamless operation and data processing, integrated with high-quality components, including Innodisk's reliable DDR5-6400 CSODIMM and PCIe Gen. 4 M.2 SSD. The unique Innodisk MIPI Over Type-C Camera kit enables advanced vision-based AI capabilities. With AI compute power of up to 99 TOPS, this platform is ideal for demanding Edge AI workloads. Whether you're building smart city solutions, industrial automation systems, or advanced robotics, the Arrow Island Reference Kit provides a comprehensive and reliable foundation for your project.
