Boosting Efficiency with RA-C1010: Powered by the N97 CPU

The RA-C1010 is a compact retail mini PC built on the 12th Gen Intel® Core™ platform, designed for ultra-low power consumption and featuring a diverse range of interface options. It supports multiple independent display outputs simultaneously, making it an ideal solution for various retail industry applications. This versatile device can be seamlessly integrated into the retail sector, enabling intelligent and efficient control and management. It significantly enhances operational efficiency and improves service quality, offering a reliable solution for modern retail environments.
