**SEAVO**<sup>®</sup> **SEAVO MOTHERBOARD**  
NAVIGATOR OF INDUSTRIAL M/B IN CHINA

### SEAVO: Pioneering Innovation in Industrial Motherboards for 32 Years

Since 1992, SEAVO has been dedicated to the R&D and innovation of industrial motherboards, achieving several industry milestones: the first company in mainland China to develop x86 motherboards, the first to raise quality standards to 0.02%, and the first to design Intel's high-performance reference boards. Over the past 32 years, SEAVO has launched over 1,000 products with annual sales exceeding 1 million units, serving leading companies across Taiwan, Germany, France, Japan, South Korea, and Switzerland, including 100+ listed companies and Fortune 500 firms. As a navigator in industrial control motherboards, SEAVO is crucial to the advancement of "turning machines into humans."
