### X14 Edge AI Box PC

Supermicro's E403 is a compact box PC that brings data center-level performance to the edge. Equipped with a powerful x86 processor, the SYS-E403-14B is a versatile solution that can handle a broad range of workloads. Its compact form factor enables deployment in space-constrained environments, whether mounted on a wall or as a portable device, making it perfect for edge computing deployments in diverse industries.
