AI that moves the world.

That's the power of Intel Inside®.

GIFA 吉方工控 INDUSTRIAL CONTROL × **intel**®

Next-Gen AI Edge Computing Solution

The RB-B120 industrial embedded computer demonstrates an Intel® Core™ Ultra–powered edge AI platform for industrial and automation applications.

Featuring the Intel® Core™ Ultra 5 processor 125H with CPU, GPU, and NPU integration, it delivers reliable AI and high-performance computing in a rugged, compact design. Industrial-grade I/O, wide-range power input, and a one-touch OS Recovery button ensure system reliability and fast deployment in harsh environments.
