

AI that moves the world.

That's the power of Intel Inside®.

Next-Gen Industrial AI Solutions Unveiled

Join GIGAIPC to experience a comprehensive spectrum of industrial solutions, ranging from compact edge controllers to high-performance computing powerhouses. We are proud to unveil our Next-Gen AI lineup powered by Intel® Core™ Ultra processors (Series 2). This features the QBiX-Pro-ARUA255H, serving as the intelligent brain for AGVs/AMRs with NPU-accelerated navigation, and the uATX-Q870A motherboard, delivering desktop-level performance for high-end AOI inspection.

Complementing these are our Smart Factory Essentials powered by Intel Atom® x7000RE processors. The rugged QM-7433REA mini-PC and the ultra-compact QBiX-DR-AMLA7433REH-A1 ensure reliable data acquisition and control in the harshest environments. From the control cabinet to the mobile robot, discover how GIGAIPC's diverse form factors and Intel technologies are redefining the future of industrial automation.
