### High-Performance POS with Intel® Processor N97 — Powering the Core of Modern Business

In today's fast-paced retail and hospitality environments, businesses need solutions that deliver speed, reliability, and operational flexibility. The [HiStone Hero II \(HK578N\) POS](#), powered by Intel® Processor N97, addresses these challenges with a powerful, compact design that optimizes space without compromising performance.

Its foldable, low-profile base and VESA mount compatibility enable flexible deployment in diverse environments — from front counters to self-service stations. The die-cast aluminum housing ensures long-lasting stability and durability, even under high transaction volumes. A rich I/O interface (USB 2.0/3.0, Type-C, serial, LAN, cash drawer) supports a wide range of peripherals, making integration seamless.

Unlike many POS systems on the market, Hero II combines elegant design, robust performance, and deployment versatility, empowering businesses to improve service efficiency, reduce operational costs, and create a smooth customer experience.
