Retail Excellence Through Purposeful Innovation

For over 36 years, HiStone has redefined what excellence in retail technology looks like — through unmatched precision, performance, and purposeful innovation. As a trusted partner to many of the world's leading retailers, HiStone manages every phase of product creation — from industrial design and engineering to manufacturing and integration. ensures every solution is expertly built, combining sleek, design-led form with dependable, real-world functionality. From self-service kiosks and self-checkout systems to POS, KDS, and modular terminals, HiStone delivers tools that support retail at scale — and perform where it counts.

With global reach and local expertise, HiStone systems deploy across regions and adapt effortlessly to market needs. They're engineered for continuous use in high-demand environments, backed by supply chain control and trusted worldwide. Reliability isn't an afterthought — it's built into every unit. That's why the most operationally demanding retailers depend on HiStone to keep their stores running — day in, day out.

At NRF 2026, retail leaders will get an exclusive look at what's next. HiStone will showcase its latest self-service, POS, and AI-integrated solutions, powered by 12th/13th Gen Intel® Core™ processors and Intel® Processor N97 — each designed to help businesses navigate complexity, scale with confidence, and create meaningful in-store interactions.
