

*Implementing i3Ai Sentry was straightforward, requiring only the addition of necessary components and optimal camera placement to ensure accurate results.*

Chris Vandiver, Loss Prevention Director at Cosentinos

The i3Ai Sentry is a cutting-edge physical identity management solution that utilizes advanced photo matching technology to provide seamless control over access points, user management, and security oversight. By offering highly customizable access schedules, comprehensive reporting, and real-time alerts, i3Ai Sentry allows businesses to enhance their security protocols while maintaining a user-friendly interface.

# i3Ai Sentry

accelerated by **intel**.
