> KV Swami, Technology Overseer at BAPS Swaminarayan Sanstha

Secure Display Stations are specifically designed to display live video from any IP security camera on up to three monitors of any type simultaneously. Engineered for use by non-security personnel, they feature tamper-proof hardware that can be deployed in public areas without cybersecurity risks. This versatile solution also integrates digital signage capabilities, providing users with enhanced functionality. It improves situational awareness, deters crime, supports operations, and ensures visibility in confined spaces or remote locations. With secure cloud-based management, Secure Display Stations offer an intuitive user interface, enabling seamless remote operation of devices from anywhere.
