

Intelligence is your edge.

Powered by Intel.

Advanced ITS Solutions

Presenting our full suite of advanced ITS solutions, powered by Intel, that highlight AI-driven solutions for improved traffic management and highway safety:

- **Intellisession®:** Advanced intersection monitoring, delivering actionable insights to enhance road safety.
- **Automated Incident Detection:** Real-time identification of roadway incidents to improve traffic management and emergency response.
- **SecurOS® Soffit:** Pedestrian safety system designed for modern urban mobility needs.
- **SecurOS® Auto:** Cutting-edge license plate recognition (LPR) software for secure, efficient vehicle identification
- **SecurOS® Motus Pro:** High-performance LPR camera, optimized for tolling and other traffic environments.

Each solution leverages Intel's OpenVINO™ toolkit, which has been fundamental in the development and refinement of our ITS analytics. This joint presence at the ITS World Congress will allow both teams to engage with industry leaders, gather valuable feedback, and reinforce the joint value proposition to the ITS market.
