

100% Local, Secure AI You Can Trust

AirgapAI

AirgapAI is an advanced on-device AI edge solution that runs completely locally to ensure maximum security, control, and speed, for a fraction of the cost of other Copilot solutions. Powered by our patented Blockify data ingestion engine, it increases accuracy by up to 78X, virtually eliminating hallucinations, allowing your teams to inference against their unique data with confidence.¹

With its innovative Entourage Mode, multiple specialized AI personas collaborate seamlessly to provide domain specific insights and granular, role-based data governance.

Experience true data ownership, rapid deployment, and zero network latency while leveraging cutting-edge real-time AI performance tailored for modern enterprise needs.

Key Intel-Enabled Features

Blockify for 78X LLM Accuracy

No Network Connection

BYOM Open Source LLMs

Multiple Specialized Chatbots

AirgapAI by Iternal, optimized with Intel® technologies, delivers:

- Ultra-accurate LLM responses powered by Blockify® and Intel® Core™ Ultra processors
- Fully offline AI performance with zero latency enabled by efficient on-device compute
- Flexible model deployment supported by open-source LLMs and Intel® Gaudi® accelerators
- Multi-agent collaboration accelerated by parallel processing across Intel® hardware
