

AI that moves the world.

That's the power of Intel Inside®.

Edge AI Empowering Industrial Automation

Experience the future of industry at Jetway booth under the theme "Edge AI Empowering Industrial Automation." We are proud to present our latest innovations built on Intel's cutting-edge platforms and show how our scalable hardware and low-power designs are driving the next wave of industrial intelligence.

Key Highlights:

- **High-Performance & Scalable AI Acceleration:** Discover our LGA1851 Socket-Type Platforms, powered by Intel® Core™ Ultra processors with integrated NPU for specialized AI acceleration. These are specifically engineered for high-end AI applications and industrial control, offering the expandable power needed for intensive edge workloads.
- **High Reliability & Low Power Platforms:** Explore our energy-efficient solutions featuring Intel Atom® processors. These platforms range from industrial motherboards to intelligent networking and smart automation, balancing rock-solid stability with optimized power consumption.
- **Integrated Solutions:** We are also showcasing a versatile lineup of Intel-based Panel PCs in various form factors, designed to streamline HMI in any industrial setting.
