

Making Every Camera an AI Supervisor

Aicumen AI Supervisor

Aicumen AI Supervisor is an edge AI video analytics platform that transforms existing CCTV infrastructure into a 24/7 digital supervisor for safety, security, and operational excellence.

Analyzing live video streams in real time, the solution detects safety violations, security threats, process deviations, and other critical events, then delivers alerts, evidence, reports, and actionable insights to help organizations respond faster and operate more efficiently.

Running on 14th Gen Intel® Core™ processors and Intel® Processor N-series and leveraging OpenVINO™-optimized AI inference, Aicumen AI Supervisor delivers scalable, low-latency performance while helping organizations unlock new intelligence from existing camera investments.

Insights

- [14th Gen Intel® Core™ processors](#) and [Intel® Processor N-series](#) power low-latency video analytics across existing CCTV infrastructure.
- [OpenVINO™ toolkit](#) accelerates AI inference for real-time detection of safety, security, and operational events.
- Intel-powered edge deployment enables on-premises processing, helping keep video data local and secure.
- Optimized Intel® architectures support scalable multi-camera monitoring without replacing existing camera investments.

By leveraging Intel® technologies, Aicumen AI Supervisor transforms existing CCTV infrastructure into an intelligent, real-time monitoring system that automates safety, security, and operational oversight to reduce risk and improve compliance.

*Aicumen's AI Supervisor transforms video surveillance from a passive recording system into an **active driver of safer, smarter, and more efficient operations.***
