NCR VOYIX x intel®

Next-Gen Edge Solutions for Retail

NCR Voyix Edge is the only edge-native application engine purpose-built for retail and restaurants, enabling shopping and dining environments to run technology at the site level with cloud-like agility and local resilience. Built on Intel's advanced edge computing technologies, Voyix Edge leverages Intel® architecture to maximize processing power, security, and scalability, ensuring retailers and restaurants can deploy next-generation solutions with confidence. Voyix Edge transforms your edge infrastructure into an agile runtime environment, enabling critical in-store applications to run with superior speed, agility, and local resilience. It combines modern edge infrastructure, foundational security, dynamic scheduling, and resilience by design to optimize edge-application performance. By virtualizing and containerizing workloads, it accelerates software updates, extends hardware life, and powers compute-intensive technologies such as AI, machine learning, and robotics—delivering exceptional performance, efficiency, and customer experiences.
