

At Soterix Systems, we believe operational data should work for you—not sit unused. Our AI-powered platform transforms raw inputs into real-time, actionable business intelligence that helps you reduce costs, optimize workflows, and unlock greater ROI. It's not just smart technology—it's smarter operations.

John Doody, Sales Director at Soterix Systems

NexaiQ Platform

accelerated by **intel**.

NexaiQ by Soterix Systems is a versatile AI cloud computing platform designed to revolutionize device and IoT management. It leverages existing hardware, offering device-agnostic integration and seamless scalability. The platform provides real-time video and sensor data analysis, delivering actionable intelligence to enhance security and operational efficiency. Supporting industries such as healthcare, retail, places of worship, education, smart cities, and commercial real estate, NexaiQ enables cost-effective modernization. With flexible deployments (cloud or edge) and end-to-end encryption, it ensures security, while simplified licensing and an adaptable cloud transition path drive value and efficiency.

Key Features				
	Real-time AI Analytics	Device-Agnostic Integration	Secure Cloud & Edge Processing	Unprecedented Scalability

AI platform delivering real-time insights across industries

Vertical Market:
Retail
Education
Government
Medical

Horizontal Market:
AI

Country/Geo:
North America
