

“Nx Witness has been a game-changer for our surveillance. It allowed us to move away from a restrictive, proprietary system to a flexible, scalable solution that meets our current needs and prepares us for the future.”

Grant Weaver, IT Director at Saigon South International School

# nx Network Optix

## Nx Witness VMS

accelerated by **intel**.

Nx Witness VMS is a lightning-fast, easy-to-use, cross-platform video management system designed to discover, view, record, and manage cameras IP video cameras so you can monitor, analyze, and react to critical events in real-time. Our system includes:

- Nx Cloud: Secure, web-based portal access for remote system management.
- Nx Desktop: A feature-rich client for Windows, Linux, and macOS.
- Nx Server: Scalable, efficient, and hardware-flexible for any deployment.
- Nx Mobile: Live monitoring, playback, and alerts on iOS & Android.
- Nx Toolkit: Seamless third-party integrations for a customized solution.

Key Features				
	Supports Varied Camera	Fast Setup & Easy Maintenance	Extremely Dependable	Infinitely Scalable

Offers a lightning-fast, user-friendly, and versatile VMS

**Horizontal Market:**  
Security

**Use Case:**  
Logistics & Tracking  
Situational Monitoring  
Product Inspection
