

Order Assistance Automation with Conversational Agent AI

SodaClick Voice

Conversational AI that delivers speed, accuracy, and accessibility.

SodaClick's conversational voice AI models for quick service restaurants provide real-time, human-like and personalized experiences in over 96 languages and variants. Deploy conversational voice AI for self-service kiosks to enable highly accurate, omnichannel virtual assistants that offer upsells and recommendations and are accessible to those with visual or physical impairments.

For drive-thru systems, deploy conversational voice AI-powered assistants that automate order taking and enhance customer interactions to provide consistent, high-quality customer service, and shorten order times with 98% order accuracy.¹

SodaClick conversational voice AI uses LLM models to deliver unscripted and engaging experiences to customers, with tailored responses specific to the conversation.

Key Intel-Enabled Features
