ELO x intel.

Compact AI-Ready Solution

At Elo's booth, discover how the Elo Backpack, powered by Intel, is redefining the edge experience for businesses worldwide. Compact yet powerful, this enterprise-grade mini PC brings together Windows 11 OS and Intel's high-performance processors to deliver exceptional reliability, advanced connectivity, and AI-ready computing—designed for the most demanding retail, hospitality, and automation environments.

Built for flexibility, this edge computing solution can easily mount behind any display with a universal VESA design, providing a small footprint and remote-management capabilities that streamline deployment across locations. With Intel® Core™ performance and up to 32 pTOPS of AI capability, businesses can now run intelligent workloads, from digital signage and self-service kiosks to kitchen automation systems and data visualization, faster and smarter at the edge.

Experience firsthand how Elo and Intel are bringing scalable, secure, and connected edge solutions to life, helping enterprises bridge endpoints to the cloud with unmatched performance, efficiency, and design versatility.
