## Hisense x intel®

### Empowering Interactive Spaces

Hisense selected the Intel® Core™ i5-12450H processor for its OPS module to provide the essential performance, efficiency, and platform stability required for demanding interactive applications in classrooms and meeting rooms. This collaboration leverages Intel's leadership in compute power and platform features to enable Hisense to deliver a seamlessly integrated, high-performance, and future-proof computing solution within its interactive displays. Together, we empower users with reliable, secure, and intuitive technology that drives engagement and productivity.
