## **AI-Powered Smart Display Solutions**

In addition to showcasing hardware, we will demonstrate a four-channel video wall solution based on the K115D5 at our booth, integrated with a content management system for remote content distribution and management. Additionally, we will showcase various IFPD smart scene applications powered by the AI OPS PC.

**H Series Digital Signage Player:** The H series, built on the Intel Atom® platform, offers great value with a fanless design. It's perfect for simple, lightweight digital signage applications, delivering efficiency in a compact form.

**K Series Digital Signage Player:** Powered by Intel® Core™ Ultra processors, the K series provides reliable performance for display solutions in malls, hotels, offices, business centers, and more.

**L Series Digital Signage Player:** Featuring Intel® Core™ S-Series processors, the L series is ideal for high-quality displays in retail and high-traffic areas, maximizing impact and business opportunities.

**AI OPS PC:** Equipped with Intel® Core™ Ultra processors, the AI OPS PC supports a variety of AI applications, enabling personalized teaching and smart meeting environments.
