Portwell: Powering the Future of Edge AI and Industrial Innovation

Visit Portwell at Booth #3060, discover how Portwell is driving innovation in Edge AI and industrial computing. At EWNA 2025, we're showcasing our latest embedded solutions designed to empower developers, system architects, product managers, and technical executives across industries.

- **Live Demo:** Experience our smart parking access control solution powered by a compact, rugged embedded system featuring energy-efficient Intel Atom® x7000RE Series processors.
- **Explore Our Portfolio:** Discover Portwell's broad range of embedded boards and systems built on the latest Intel® processors—purpose-built for industrial environments and AI-driven applications.
- **Meet the Experts:** Connect directly with Portwell's product specialists and project leads to discuss your unique challenges and goals.
- **Accelerate Your Innovation:** Learn how Portwell's solutions—powered by Intel processors and advanced Edge AI technologies—can help streamline your design process and fast-track your deployment cycles.
