Posiflex: Innovating POS and Self-Service with Intel® Technology

Posiflex is a global leader in point-of-sale and self-service solutions, known for combining sleek design with powerful performance. Through a strategic partnership with Intel, Posiflex integrates advanced Intel® processors across its product lines to deliver fast, reliable, and scalable technology for retail, hospitality, and enterprise environments.

From the GT Series POS terminals and BT Series modular kiosks to the voice-enabled Cachet Series, Posiflex products showcase the synergy between Intel innovation and Posiflex's engineering expertise. This collaboration enables businesses to create smarter, more engaging customer experiences with solutions that are both future-ready and adaptable.
