Private Edge AI for Proactive Video Security

Smart Workflow Platform

Smart Workflow Platform by Achiever Technology transforms document-driven processes into ***intelligent workflows that improve productivity, compliance, and agility.***

Smart Workflow Platform by Achiever Technology is an AI-powered workflow automation solution that connects ERP, CRM, HR, finance, email, and other business systems into a unified operational environment. The platform automates approvals, data movement, and cross-functional processes while maintaining human oversight and auditability. Its built-in AI assistant enables users to retrieve information from enterprise documents and transform natural-language requests into workflow-ready actions, helping reduce manual effort and accelerate decision-making.

Built on Intel® Xeon® processors and optimized with the OpenVINO™ toolkit, the solution delivers scalable AI performance for enterprise workloads. Intel vPro® platform capabilities support secure, manageable deployments, while Intel® graphics help enable responsive AI experiences across edge and business environments.

Intel® AI Edge Applications

Key Intel-Enabled Features

AI Workflow Automation

Document Intelligence

Optimized Processing

Scalable Edge AI

- Intel® Deep Learning Boost (Intel® DL Boost) and OpenVINO™ toolkit accelerate document classification, semantic search, and AI-driven insights.
- Intel® Xeon® processors deliver the compute performance needed for scalable workflow automation and enterprise AI workloads.
- OpenVINO™ toolkit helps optimize AI inference across document-intensive workflows and edge environments.
- Intel vPro® platform enables secure deployments, remote device management, and efficient administration across distributed locations.

By leveraging Intel® technologies, Smart Workflow Platform by Achiever Technology helps reduce delays, compliance risk, and limited visibility caused by fragmented systems, manual workflows, and document-intensive processes.
