

Rugged, Compact Edge System Powering Automation, HMI, and Smart Applications

EdgeComp MS-1335U

Compact Fanless System Delivering Reliable Edge Computing for Smart Automation

[EdgeComp MS-1335U](#) is a rugged, fanless industrial PC engineered to bring advanced intelligence to the edge. Powered by 13th Gen Intel® Core™ processors, it delivers accelerated AI inference, responsive multi-core performance, and seamless real-time control for automation. Its rich I/O, wide-temperature durability, and 24/7 reliability enable fast, scalable deployment across HMI systems, smart manufacturing lines, and intelligent retail deployments. By combining optimized compute with integrated Intel technologies, the system transforms edge data into actionable, on-site insights.

Key Features

High-Performance CPU

Expandable Memory

Dual Fast Network Ports

Multi-Screen 4K Visuals

Intel Products & Technology
