Secure Courtroom AI Intelligence at the Edge

CourtCapture Pro AI

BEINCOURT Serving justice. Virtually. X ASUS X intel

By leveraging Intel® Technologies, CourtCapture Pro AI by BEINCOURT helps courts gain fast and incredibly high-quality speech-to-text securely and locally at the edge.

CourtCapture Pro AI is BEINCOURT's court-grade recording and edge intelligence platform. Running on the ASUS NUC 16 Pro and powered by Intel® Core™ Ultra Series 3 processors, it captures up to 16 isolated audio and eight video channels while preserving evidentiary integrity through seal/unseal controls, metadata, file hashes, and chain-of-custody workflows.

Integrated with conferencing and case-management systems, the platform is built with Metro AI Suite and optimized through the OpenVINO™ toolkit to run Whisper speech-to-text and multilingual translation locally on Intel-based edge compute inside the courthouse. By reducing cloud dependency, supporting low-latency processing, and keeping sensitive judicial data under court control, CourtCapture Pro AI helps modern courtroom operations. Planned capabilities include hearing summaries, judicial notes, evidence indexing, metadata tagging, and intelligent search, with a scalable path from a single courtroom to enterprise-wide deployment.

CourtCapture Pro AI by BEINCOURT delivers fast, local transcription and translation, while keeping sensitive court room audio, video, and judicial data under court control.

Key Intel-Enabled Features

Real-Time AI and analytics make it easy

- Fast Edge Inferencing
- Privacy at the Edge
- Integrated GPU
- Scalable Deployment

Powered by Intel® processors and optimized with the OpenVINO™ toolkit, BEINCOURT and ASUS deliver:

01

OpenVINO™ toolkit speeds Whisper transcription for courtroom AI.

02

Metro AI Suite secures on-premises AI workloads.

03

Intel® Arc™ Pro B-Series graphics accelerate AI and future agentic workloads.

04

Intel® Core™ Ultra processors deliver low-latency, resilient edge processing.

That's the power of Intel Inside®.
