

Semi-Ruggedized Slim PC with Intel® Core™ Ultra Processors

DB860

Powerful 1-Liter System for Graphics, AI & Data Workloads

Shuttle [DB860](#) is a compact 1.3-liter edge AI PC designed for reliable, high-performance deployments in commercial and industrial environments. Powered by Intel® Core™ Ultra processors with integrated CPU, GPU, and NPU cores, it delivers up to 36 TOPS to accelerate real-time AI tasks such as image recognition, object detection, and intelligent analytics.

The DB860 supports quad-display output via HDMI and DisplayPort, making it ideal for digital signage, AI kiosks, control rooms, and multi-screen setups. Extensive I/O—including dual Ethernet LAN, multiple USB ports, and COM serial interfaces—ensures smooth integration with sensors, controllers, and legacy devices. Two built-in M.2 slots provide flexible options for NVMe storage and wireless connectivity. Engineered for 24/7 operation at 0–50°C, DB860 offers a robust, space-efficient, and expandable platform that delivers consistent performance at the edge.
